

## HEALTH Academy

emy	Hepatitis A	Typhoid	Diptheria Tetanus Polio	Cholera	Hepatitis B	Rabies	Yellow Fever	Men ACWY	Tick borne encephalitis	Japanese encephalitis	Tuberculosis
Consider high risk factors:											
Disease risk in region											
Remoteness											
Activities											
Length of stay											
Medical conditions											
Certificate req											
Current outbreaks											
Some things to											
consider:											
Whether disease is risk in country											
Length of stay											
Medical history											
Vaccination status											
Activities											
Purpose of trip											
Accommodation											
Consider:											
Up to date with vaccination schedule											
No higher risk than in UK or Ireland											
Whether disease is a risk in the region or country
