# Detailed Course Description

This half-day workshop provides an update on diabetes diagnosis and management for practice nurses and other allied registered healthcare professionals who have already completed initial diabetes training and are regularly seeing diabetic patients. Participants will review current guidelines, revisit evidence-based diagnostic and treatment pathways, and sharpen their skills in assessing and managing diabetes in primary care.

Developed in line with current UK National Standards and Guidelines (including those in England, Wales, Scotland and Northern Ireland) and guidance from the NHS, NICE and Best Practice Guidelines and Competency Frameworks.

## Diabetes Update for RHCPS: Core Modules

- **Overview of Diabetes**
  - Review of pathophysiology and risk factors for diabetes
- **Latest Guidance on Diagnosis of Diabetes**
  - Updates and review of diagnostic criteria and investigations
  - Interpretation of results
- **Management Pathways**
  - Review of latest guidelines and research recommendations
  - Updates in latest treatment, medication and management options
- **Optimising Diabetes Reviews and Self Management Strategies**
  - Annual review requirements
  - 8 care processes
  - Assessing diabetic control and identifying areas for improvement
  - Lifestyle advice
  - Enhancing patient empowerment and self-management
- **Assessment and Management of Diabetic Complications**
